CHARITY COMMISSION
FOR ENGLAND AND WALES

Trustees' Annual Report for the period

From: 1 July 2023 **Period start date** **To:** 30 June 2024 **Period end date**

Charity name: British Hydrological Society

Charity registration number: 327488

Objectives and Activities

Summary of the purposes of the charity as set out in its governing document (SORP ref Para 1.17)	The British Hydrological Society (BHS) charitable purpose is the advancement of education. The aims of the Society are, in accordance with guidance on Public Benefit, to promote interest, scholarship and good practice in both the scientific and the applied aspects of hydrology and to foster the involvement of its members in national and international activities directed to the promotion of hydrology.
Summary of the main activities in relation to those purposes for the public benefit, in particular, the activities, projects or services identified in the accounts (Para 1.17 and 1.19)	Main activities undertaken by the Society to meet the aims of the Society: - Held regular meetings including joint meetings with other organisations, groups and societies to discuss hydrological subjects. - Published and circulated the Circulation newsletter to all Society members to disseminate information relating to both national and international activities and developments in the field of hydrology. - Promoted the publication of hydrological literature. - Fostered and co-operated in inter-disciplinary activities with other national and international organisations with related interests. - Promoted the formation of regional and local sections of the Society. - Undertook all such other lawful activities as shall further the aims of the Society.
Statement confirming whether the trustees have had regard to the guidance issued by the Charity Commission on public benefit (Para 1.18)	The Trustees, in exercising their powers and duties, have complied with their duty to have due regard to the guidance on public benefit published by the Charity Commission.

Additional information

Policy on grant making (SORP ref Para 1.38)	**Travel Grants** The BHS Travel Grants are a scheme to assist attendance at conferences, symposia and workshops to foster the involvement of BHS members in activities directed at promoting, advancing, and building esteem of hydrology. The scheme primarily applies to international travel, and only exceptionally travel within the UK **Exeter Fund** The Exeter Fund (EF) is an endowment arising from surplus money generated by the 1st Scientific Assembly of the International Association of Hydrological Sciences (IAHS) held at Exeter University in 1982. The EF was initially administered by the Royal Society, before being transferred to BHS in 1991. It provides grants to assist attendance at biennial IAHS Scientific Assemblies and International Union of Geodesy and Geophysics (IUGG) General Assemblies held outside the UK, and to encourage early career scientists to become involved with IAHS as an Association. From January 2019 onwards operational aspects of managing the EF, e.g. awareness (via BHS channels), inviting applications and selecting awardees, will be undertaken by the UK Committee for IAHS (UKIAHS). The UKIAHS will liaise with BHS via the Honorary Treasurer, who will arrange for payment of EF grants. BHS Trustees will continue to monitor how the EF is used and include financial details of it in the externally examined report that BHS is obliged to file with the Charity Commission each year.
Policy on social investment including program related investment (Para 1.38)	None
Contribution made by volunteers (Para 1.38)	The Society is dependent upon the efforts of unpaid members throughout its structure for its governance and for most of its activities. The administrative functions are provided by The Institution of Civil Engineers (at a discounted cost rate to BHS). The UK Centre for Ecology and Hydrology supports the Society's quarterly newsletter (Circulation). Other bodies support the Society by sponsoring conferences and symposia. Many organisations encourage their employees to be involved in the Society, e.g., by joining the Main Committee, and support this in terms of providing time and/or reimbursement of expenses.
Other	**Website**

	The website continues to provide an important means of disseminating information about the Society and current hydrological issues to members and anyone else interested. It gives information about the Society's activities, awards, and administration. The calendar of national and regional meetings and events includes joint meetings and relevant international events organised by others. The site also includes information for members considering routes to chartered status with other institutions and general information on careers and sources of hydrological data. The Society publishes a listing of hydrological consultants and provide space to advertise hydrology-related jobs. There are also links to the BHS Mail base (members mailing list), outputs from past meetings, consultation responses, BHS publications, national current and historic hydrological data holdings.

Achievements and Performance

Summary of the main achievements of the charity, identifying the difference the charity's work has made to the circumstances of its beneficiaries and any wider benefits to society as a whole (SORP ref. Para 1.20)	**Events held** 2023 - July 2023: National webinar - Making more hydrometric data open access - the Hydrology Data Explorer - 12 September 2023: National webinar and Annual General Meeting – - 12 October 2023: National webinar - NRFA/SAGA 40th Anniversary event - 6 November 2023: National meeting at the ICE – BHS 40th Anniversary event. - 29 November 2023: National webinar – COSMOS Turning 10 years old. 2024 - 30 January 2024: Regional webinar – Open methods in flood hydrology. - 12 March 2024: Regional webinar – Communication of science and weather. - 26 March 2024: National webinar – Flood Hydrology Roadmap - 8-9 May 2024: Early Careers National event - Peter Wolf Symposium - 10-11 June 2024: National meeting at the Royal Society - Hydrology in the 21st Century Challenges in Science, to Policy and Practice. **Publications** Circulation – Four issues of the BHS newsletter were published during the year. This newsletter is disseminated to all members and includes information relating to both national and international activities and developments in the field of hydrology. **Prizes awarded** Prizes to the value of £370 were awarded for the best oral presentation (£125), the best 'quick-fire' presentation (£125) and

	best poster (3 x £40) at the 2023 Peter Wolf Symposium for early career hydrologists. Undergraduate dissertation prize winners were decided and announced in 2023/24. **MSc Studentship Scheme** The MSc Studentship Scheme is a partnership with JBA Trust and the Environment Agency. It was established in 2012 to provide limited support to several students, has been successfully run on an annual basis and continues to attract high quality applications (see Public Benefit section). In the year to end June 2024, seven awards at £2,500 each were paid out to master's students studying hydrology related courses at the Universities of Birmingham, Oxford, Loughborough (2) and Lancaster (3). **Impact of the charity's work on the circumstances of its beneficiaries and any wider benefits to society as a whole** The BHS held several major BHS events in the last year. This has helped us engage with 200+ hydrologists from across the UK including BHS members and other hydrologists who may not be members. The BHS 40th Anniversary event held at the ICE on 6 November 2023 included 58 presentations and 70 posters that allowed hydrologists to showcase a wide range of their work with the wider community. It also included a series of workshops and community gatherings which allowed hydrologists to expand their network. The BHS supported four early career researchers to attend the Symposium and present their research. The BHS held an AGM which included a series of reports from the President, Honorary Treasurer, Early Careers sub-committee, Communications and Publications sub-committee and Events sub-committee. This allowed the community to hear about the achievements and work of the Society over the year.

Additional information
You may choose to include further statements where relevant about:

Achievements against objectives set (Para 1.41)	No objectives set
Performance of fundraising activities against objectives set (Para 1.41)	No fundraising activities
Investment performance against objectives (Para 1.41)	Not applicable

Financial Review

Review of the charity's financial position at the end of the period (Para 1.21)	At the end of the 2023/24 financial year, the General Accumulated Fund for the society was £86,448. This small decrease (~£4k) from 2022/23 was expected because, 1. 2022/23 included a very significant income from the BHS Symposium and a substantial donation. 2. In 2023/24 there was an £8k expenditure on the 40th Anniversary event; and 3. Income from subscriptions was down very slightly.
Statement explaining the policy for holding reserves stating why they are held (Para 1.22)	The trustees have reviewed the reserves of the charity. The trustees consider it prudent to keep unrestricted reserves at levels which ensure that there are sufficient funds to meet the needs of current and future activities which includes under-writing the costs of large symposia which could leave the Society with considerable liabilities in the event of enforced last-minute cancellation. However, this year the committee decided to introduce free membership for undergraduates and apprentices to slightly reduce the reserves and to support early career members. The activities of the Society are otherwise largely regular and predictable in the medium to long term. Reserves can therefore be relied upon to act as contingency in the event of income flows being disrupted or the late cancellation/failure of such major events.
Amount of reserves held (Para 1.22)	The total funds held at the end of the reporting year was £179,254.
Reasons for holding zero reserves (Para 1.22)	Not applicable
Details of fund materially in deficit (Para 1.24)	Not applicable
Explanation of any uncertainties about the charity continuing as a going concern (Para 1.23)	None at present

Additional information

You may choose to include further statements where relevant about:

The charity's principal sources of funds	The principal source of income for the Society was subscriptions from members (£24,994) and income from meetings and symposia (£9,410).

(including any fundraising) (Para 1.47)	In addition, £11,700 was received as contributions to the studentship scheme from third parties.
Investment policy and objectives including any social investment policy adopted (Para 1.46)	The Exeter Fund is an endowment fund which is invested in a Charities Official Investment Fund. Over the year this generated income of £1,990 in dividends and showed an unrealised investment gain of £5,582. Travel grants made in the year amounted to £453. The total market value of the fund as of 30 June 2024 was £92,806; this compares to £85,687 at the year-end of June 2023.
A description of the principal risks facing the charity (Para 1.46)	The main risks to the Society are: - Large drop in number of members affecting funding - Event cancellation and associated loss of funds already committed - Loss of contributions to the studentship scheme from third parties. The risks to which the Society is exposed have been reviewed and procedures established to manage those risks. This includes items such as the reserves policy and degree of financial dependency.

Structure, Governance and Management

Description of charity's trusts

Type of governing document (SORP Para 1.25)	The British Hydrological Society was formed by statutes adopted on 1 December 1985 (amended 23 March 1987, 19 September 2007, 11 September 2013 and 18 April 2018).
How is the charity constituted? (SORP Para 1.25)	Charity registered 25 August 1987.
Trustee selection methods including details of any constitutional provisions e.g. election to post or name of any person or body entitled to appoint one or more trustees (SORP Para 1.25)	All Trustees are volunteers who are nominated and elected by the Society's membership and serve for a fixed term depending on their role. Application to stand for election must be supported by two nominators from the BHS membership. The BHS replaces Trustees whose roles expires each year to make sure the Society can continue to operate but also to bring in fresh ideas and energy to keep us moving forward. The BHS encourages people from all backgrounds and experiences to apply. The Trustees represent the membership, and it is important that those voices are as diverse as possible.

Additional information

You may choose to include further statements where relevant about:

Policies and procedures adopted for the induction and training of trustees (Para 1.51)	The BHS Executive Committee provides training for new trustees. This includes the following information: - Charity trustee welcome pack - Terms of reference for their specific trustee role - BHS statutes It also includes a training presentation with slides on: - Delivering purpose - Governance vs management - Responsibilities and duties - Links to Charity Commission and BHS websites to view additional information.
The charity's organisational structure and any wider network with which the charity works (Para 1.51)	The BHS must have 8 -14 trustees with three Honorary Officers: President, Honorary Secretary, Honorary Treasurer. The BHS also has either a President Elect or a Past President and 4-10 Ordinary Trustees, each of which should have either a Chair or Secretary role within a sub-committee.
Relationship with any related parties (Para 1.51)	The British Hydrological Society was originally co-sponsored by the Institution of Civil Engineers (ICE) and the UK Centre for Ecology & Hydrology (formerly through the Institute of Hydrology). **Institution of Civil Engineers** The Institution, with its headquarters in central London, provides secretarial and administrative functions, including membership, administrative support of the Society's Secretary and accounting services. It is also the venue for many of BHS's national meetings.

	BHS is an Associated Society of the ICE. **UK Centre for Ecology and Hydrology** The main committee includes a representative (Co-opted member) from UK Centre for Ecology and Hydrology. **Chartered Institution of Water and Environmental Management** The main committee includes a representative (Co-opted member) from the Chartered Institution of Water and Environmental Management. **International Association of Hydrological Sciences** Following an agreement made in 1990 with the Royal Society, BHS acts as a link between the British hydrological community and the International Association of Hydrological Sciences (IAHS). An Associate Committee of the BHS, the UK Committee for IAHS, has the following main functions: • To provide channels of communication and contact between UK hydrologists and IAHS • To encourage and co-ordinate involvement of UK hydrologists in the activities of IAHS • To assist in major IAHS events in the UK • To provide advice on IAHS matters • To make nominations for IAHS awards and prizes • To make nominations for IAHS officers • To ensure that the UK discharges its voting rights in IAHS elections **European Geophysical Union** Informal links with EGU exist through members and committee members of the Society acting as session conveners and in other capacities in EGU. **UK Committee for International Hydrology** The BHS President is a member of the UK Committee for International Hydrology (UKCIH). The Committee aims to better coordinate UK contributions to international hydrological and water resources management initiatives, by promoting dialogue between organisations, encouraging collaboration and avoiding duplication. Through its Secretariat, the UKCIH coordinates the UK input to the International Hydrological Programme (IHP) of UNESCO and the water related activities of the World Meteorological Organization (WMO). **Other links** The Society maintains and continues to nurture relations with learned societies in associated disciplines, particularly: - Royal Meteorological Society - Hydrogeological Group of the Geological Society - British Dam Society - British Ecological Society - Water Industry Forum

	- British Society for Geomorphology.

Independent Examiner's Report to the Trustees of the British Hydrological Society

I report to the trustees on my examination of the accounts of the British Hydrological Society for the year ended 30 June 2024.

Responsibilities and basis of report
As the charity trustees of the Society, you are responsible for the preparation of the accounts in accordance with the requirements of the Charities Act 2011 ("the Act").

I report in respect of my examination of the Society's accounts carried out under section 145 of the 2011 Act and in carrying out my examination, I have followed all the applicable Directions given by the Charity Commission under section 145(5)(b) of the Act.

Independent examiner's statement

I have completed my examination. I confirm that no material matters have come to my attention in connection with the examination giving me cause to believe that in any material respect:

1. Accounting records were not kept in respect of the Society as required by section 130 of the Act; or
2. The accounts do not accord with those records; or
3. The accounts do not comply with the applicable requirements concerning the form and content of accounts set out in the Charities (Accounts and Reports) Regulations 2008 other than any requirement that the accounts give a 'true and fair' view, which is not a matter considered as part of an independent examination.

I have no concerns and have come across no other matters in connection with the examination to which attention should be drawn in this report to enable a proper understanding of the accounts to be reached.

Scott McGrane Honorary Treasurer

BRITISH HYDROLOGICAL SOCIETY

Notes to the Accounts for the year ended 30 June 2024

1 Responsibilities of the Committee

The Committee is responsible for maintaining proper accounting records which disclose with reasonable accuracy at any time the financial position of the Society and take reasonable steps for the prevention and detection of fraud and other irregularities. In preparing the financial statements the Committee are required to:-

a) select suitable accounting policies and then apply them consistently; and

b) make judgements and estimates that are reasonable and prudent.

2 Status

British Hydrological Society is a registered Charity in England and Wales, charity number 327488. The principal office is One Great George Street, Westminster, London, SW1P 3AA.

3 Accounting Policies

The financial statements have been prepared in accordance with the Financial Reporting Standard 102 (effective 1 January 2019) (FRS 102), the Companies Act 2006 and the requirements of the Statement of Recommended Practice (SORP) applicable to charities preparing their accounts in accordance with the Financial Reporting Standard applicable in the UK and Republic of Ireland (FRS 102) (effective 1 January 2019) (Charities SORP FRS 102).

The British Hydrological Society meets the definition of a public benefit entity under FRS 102. Assets and liabilities are initially recognised at historical cost or transaction value unless otherwise stated in the relevant accounting policy note(s).

There are no material uncertainties about the charity's ability to continue, and so the going concern basis of accounting has been adopted. The financial statements are presented in Pounds Sterling and are rounded to the nearest pound.

a) Incoming Resources

All income, including subscriptions and investment income is accounted for when received, except in the case of subscriptions which are specifically stated to be in respect of an ensuing accounting period. No credit is taken for subscriptions unpaid at the balance sheet date.

b) Resources expended

Expenditure is recognised when there is a legal or constructive obligation to transfer resources to a third party, settlement is probable, and the amount can be reliably estimated.

Most of the Society's expenditure relates to direct charitable expenditure. Fund-raising and publicity costs are not applicable, and the management and administration was provided by The Institution of Civil Engineers at a cost of £8,703.

The Institution of Civil Engineers provides meeting room hire to the Society as part of the agreed package of management and administration services. The Society is only charged for room hire if the allocation is exceeded in any calendar year (with such charges being discounted from the Institution’s standard rates).

c) Grants payable

Grants are made to persons and institutions in furtherance of the Society's objects.

d) Investments

Investments are stated at market value on the date of these financial statements. Income from investments is included in the accounts when due to be received and interest on bank deposit is accounted for on an accruals basis. Realised gains/losses on investments sold are calculated on their original cost.

a) **Financial instruments**

The Charity only has financial instruments of a kind that qualify as basic financial instruments. The Charities financial instruments are initially recognised at transaction value and subsequently measured at their settlement value.

b) **Creditors**

Creditors are recognised when a present legal or constructive obligation exists at the balance sheet date as a result of a past event, it is probable that a transfer of economic benefits will be required to settle the obligation, and the amount can be estimated reliably. Creditors are recognised at their settlement value.

c) **Fund accounting**

The charitable company maintains three types of funds:

General unrestricted funds are those which can be used in accordance with the Society's charitable objects at the discretion of the Trustees.

Restricted funds are funds which are to be used in accordance with specific restrictions imposed by donors or which have been raised by the charity for particular purposes. The aim and use of the restricted funds is set out in the notes to the financial statements.

Endowment funds are funds held on trust for the purpose of allocating travel grants to UK Hydrologists who wish to attend the International Association of Hydrological Sciences events, normally held every 2 years.
